The quality choice in medicine and the life sciences

Thieme

Thieme Medical E-Journals

Thieme Medical E-Journals are especially designed for the research and information needs of academic institutions, medical schools, hospitals, research facilities and the healthcare industry.

Our E-Journals interface is a sophisticated web service available for PCs, tablets and smartphones presenting tables of contents, abstracts and full text in high quality interactive format.

Users will be kept abreast of cutting edge developments with fast and efficient online delivery and powerful searching tools.

The screenshot displays the Thieme Medical E-Journals interface. The top navigation bar includes 'DE', 'EN', 'Home', 'Journals', 'Help', 'Contact', and 'E-Book Library'. A search bar is present with a 'Full-text search' dropdown. Below the navigation bar, there are links for 'Journal', 'Authors', 'Subscription', 'Special Section', and 'Job Board'. The main content area shows the 'Endoscopy' journal cover on the left and a list of articles on the right. The first article is titled 'Innovations and brief communications' and includes the authors 'Hirota, Masashi; Kato, Motohiko; Yamasaki, Makoto; Kawai, Naoki; Miyazaki, Yasuhiro; Yamada, Takuya; Takahashi, Tsuyoshi; Takehara, Tetsuo; Mori, Masaki; Doki, Yuichiro; Nakajima, Kiyokazu'. The article title is 'A novel endoscopic submucosal dissection technique with robust and adjustable tissue traction'. Below the title are buttons for 'Full Text', 'HTML', and 'PDF (349 kb)'. The second article is titled 'Original article' and includes the authors 'Lee, Thomas J. W.; Rees, Colin J.; Blanks, Roger G.; Moss, Sue M.; Nickerson, Claire; Wright, Karen C.; James, Peter W.; McNally, Richard J. Q.; Patnick, Julietta; Rutter, Matthew D.'. The article title is 'Colonoscopic factors associated with adenoma detection in a national colorectal cancer screening program'. Below the title are buttons for 'Full Text', 'HTML', 'PDF (249 kb)', and 'OPEN ACCESS'. The third article is titled 'Original article' and includes the authors 'Li, Zhen; Zuo, Xiu-Li; Yu, Tao; Gu, Xiao-Meng; Zhou, Cheng-Jun; Li, Chang-Qing; Ji, Rui; Li, Yan-Qing'. The article title is 'Confocal laser endomicroscopy for in vivo detection of gastric intestinal'. Below the title are buttons for 'Full Text', 'HTML', and 'PDF (249 kb)'. The left sidebar contains a 'Year' dropdown set to '2014' and an 'Issue' dropdown set to '02: 86-167'. Below the issue dropdown are links for 'Current Issue' and 'Sample Issue (01/2014)'. The top right corner shows 'not logged in' and a 'Shopping Cart' icon. The bottom right corner shows 'Thieme Verlagsgruppe' and social media icons for RSS, Facebook, and Twitter.

Selected top titles from the Thieme E-Jour

The **American Journal of Perinatology** is an international, peer-reviewed, and indexed journal publishing original research and topical reviews in neonatal and maternal-fetal medicine. From 2011 all subscribers will also receive the open-access companion *Journal AJP Reports*.

European Journal of Pediatric Surgery updates you on vital developments in pediatric surgery. Written by surgeons, physicians, anesthesiologists, radiologists, and others involved in the surgical care of neonates, infants, and children, EJPS is an indispensable resource for all specialists.

Drug Research is an international peer-reviewed journal presenting the very latest research results related to novel and established drug molecules and the evaluation of new drug development. A key focus of the publication is translational medicine and the application of biological discoveries in the development of drugs for use in the clinical environment.

Covering recent advances in psychotropic drugs, **Pharmacopsychiatry** provides psychiatrists and pharmacologists with key clinical insights, new treatment approaches and novel avenues of research. The basis of psychiatric disorders are explored using models and model theory as applied to clinical and experimental studies.

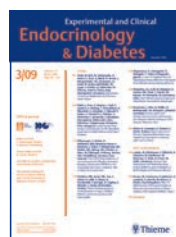

Hormone and Metabolic Research covers the fields of endocrinology and metabolism from both a clinical and basic science point of view. With a preference for experimental over observational studies, this journal disseminates new and reliable experimental data to researchers, scientists and doctors worldwide.

The **Journal of Reconstructive Microsurgery** is an international, peer-reviewed, and indexed journal dealing with original research and topical reviews for the practising microsurgeon. It is the official journal of three professional societies, including the World Society for Reconstructive Microsurgery.

International Journal of Sports Medicine publishes original research and review articles related to the field of sports medicine and exercise science. Dealing with both basic and applied information, the journal explores how human performance can be understood through the study of physiology, biochemistry, biomechanics and genetics.

Experimental and Clinical Endocrinology & Diabetes features outstanding articles covering all fields of endocrinology and diabetology. Case reports, original contributions and short communications appear in each issue along with reviews addressing current topics.

Endoscopy is the premier journal on international developments in gastrointestinal endoscopy. From top quality review articles and original contributions to fast, in-depth coverage of the most important national and international meetings to valuable surveys of diagnostic and therapeutic advances.

Planta Medica is one of the leading international journals in the field of medicinal plants and natural products. This prestigious journal has set standards across the field of medicinal plant research.

Endoscopy is the official organ of the European Society of Gastrointestinal Endoscopy (ESGE) and affiliated societies. Under the expert direction of an international editorial board, this journal presents high-quality content that addresses the needs of endoscopists, surgeons, clinicians, and researchers across the globe.

Now in its 62nd year of publication, Planta Medica has an established reputation for presenting the most up-to-date, cutting edge research findings. As the official organ of the Society for Medicinal Plant and Natural Product Research (GA), its authors and reviewers originate not only from Europe and the United States, but also from Asia, South America, and Africa.

nals platform

Neuropediatrics is the worldwide journal of choice for key insights into today's practice of pediatric. Original articles, case reports and panel discussions are the distinctive features of a journal that always keeps abreast of current developments and trends – the reason it has developed into an internationally recognized forum for specialists throughout the world.

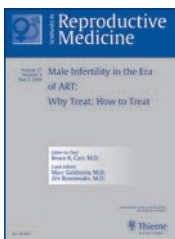

The **Journal of Neurological Surgery (JNLS)** is a major new monthly publication from the world's leading publisher in neurosurgery. The renowned expertise of Central European Neurosurgery (formerly Zentralblatt für Neurochirurgie), Minimally Invasive Neurosurgery and Skull Base have been combined and expanded into one journal.

Seminars in Hearing is an indexed review journal that publishes topic-specific issues in the field of audiology including areas such as hearing loss, auditory disorders and psychoacoustics. It is an approved provider of continuing education points by the American Academy of Audiology.

Seminars in Speech and Language is a topic-specific, indexed review journal covering the entire spectrum of speech language pathology as it relates to both children and adults. It is an approved provider of continuing education points by the American Speech-Language-Hearing Association.

Seminars in Reproductive Medicine is a topic-specific, indexed review journal that provides in-depth coverage of important advances in the understanding of normal and disordered human reproductive function, as well as new diagnostic and interventional techniques.

Seminars in Respiratory and Critical Care Medicine is an indexed review journal that publishes topical issues on respiratory and pulmonary disorders.

Seminars in Thrombosis and Hemostasis is a topic-specific, indexed review journal that focuses on all issues relating to hemostatic and thrombotic disorders.

Seminars in Neurology is an indexed review journal that publishes topic-specific issues devoted to a range of key themes in contemporary neurology.

Seminars in Liver Disease is an indexed review journal that publishes topic specific issues related hepatology and gastroenterology. It is the premiere review journal in the field, and provides in-depth coverage on a range of topics such as cirrhosis, transplantation, vascular and coagulation disorders, and pediatric liver diseases.

Journal of Wrist Surgery covers a range of issues relating to the orthopedic techniques of wrist and small joint arthroscopy, arthroplasty, and reconstructive surgery of the wrist and carpus. In addition to original peer-review articles, this quarterly periodical provides details on emerging surgical techniques, as well as case reports, reviews, and special focus sections. Topics of interest include scapholunate ligament repair and reconstruction, partial carpal fusions, foveal TFCC repair and distal radius fractures.

“Over the past three decades Seminars has established itself as a premier source of outstanding reviews of the important issues in hepatology, with a unique format that combines important new clinical information with relevant basic science background material.”

Dr. Eugene R. Schiff, University of Miami School of Medicine

*Access to all issues published online from 2000 onwards is included in the license fee of the current year. For newer titles access starts at the first date of publication.

Package Options

A selection of our best-selling medical journals is available as site license for institutions with highly attractive pricing options. Please contact us to have non-committal free trial access to the collection set up for your institution.

Backfiles

Thieme medical journal backfiles provide crucial clinical information directly to your desktop, ensuring that your institution's collection is accessible, comprehensive, and complete. Institutions can access Thieme medical journal backfiles by purchasing them on a per journal basis or as a complete package, paying a one-time fee.

e ▶ First

Selected journals publish articles online ahead of print publication through our eFirst service. eFirst articles are available immediately following completion of the peer review process, providing expedient access to critical research results.

Thieme Open is the gateway to the open access journal content from the Thieme Publishing Group. It covers both fully open access journals, as well as articles published on an open access basis in our subscription journals. All open access content published by Thieme is freely and permanently available online.

As you would expect from Thieme, all our open access journals are subject to thorough, independent peer review. Our open access articles meet the same high quality of editorial, author and production services you have gotten used to from Thieme.

Visit <http://open.thieme.com> information about all our open access titles.
